To: ALL CONSTRUCTION EQUIPMENT DEALERS HOLDING THE CASE COMPACT TRACTOR FRANCHISE

Attention: Parts Manager

Re: Parts Catalog No. 988 Covering the Haban 36" and 48" Single Stage Snow Thrower

We are enclosing a copy of the above new parts catalog. We particularly call your attention to the illustrations on the inside of the front cover and the information shown on Page 1 of this parts catalog. You will note that the attaching parts and clutch throwout mechanism, as used on the snow thrower for the 1965 compact tractors, is different from that used on the snow throwers for the 1966 compact tractors.

It will be necessary to identify positively your customer's snow thrower before ordering parts. The following information will assist you in furnishing parts for snow throwers or snow blowers:

The Model C36 and C36R two-stage snow blower was manufactured by Lambert, Inc. for the Models 130 and 180 Case garden tractors. This unit can be identified easily, as it is equipped with a separate fan to blow the snow.

The C36S and C48S single stage snow thrower was manufactured by Haban for use on the Case Models 130 and 180 garden tractors. This model included a clutch throwout lever and jackshaft linkage for starting and stopping the auger.

The D36S and D48S single stage snow thrower was manufactured by Haban for use on the Case Models 120, 150 and 190 tractors. The auger of this model is actuated by the pulley clutch lever, which is a part of the tractor.

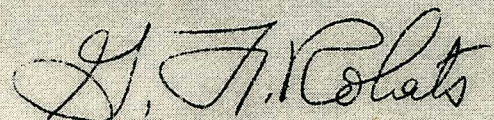

The CT36S and CT48S Haban single stage snow throwers are for use on the Colt Deluxe, Super, Super H and Rancher tractors. This snow thrower has the separate lever and jackshaft linkage for clutching.

The Model SB36 and SB48 Haban single stage snow thrower is for the Colt Models 2110, 2310, 2510, and 2712 tractors and the auger is actuated by the pulley clutch lever on the tractor.

The Model E36S snow thrower is of Case manufacture for use on the new Models 155 and 195 Case compact tractors. The parts catalog for this snow thrower will be distributed in mid-December.
